TRAK-KIT
audio/video mobile architecture

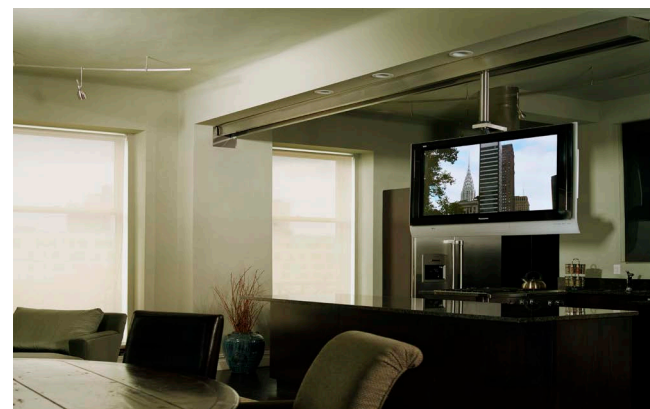

A few words about Trak-kit: Trak-kit brings architectural elegance and innovative design to any space that desires such freedoms. Trak-Kit solves the common architectural problem of fixed location displays limiting the viewing locations and room design. Trak-kit is a revolutionary patented system invented to bring flexibility and versatility to the television, home theater and video display experience. Architecturally correct, mechanically quiet and smooth, Trak-Kit is a moving experience for video.

- FOUNDER AND CHIEF DESIGNER, SHADI SHAHROKHI.
