01

STANDARD TRAK

The Standard Trak-Kit comes in manual version only. It can handle up to 200 lbs of weight. It can be either ceiling mounted or side mounted on the wall. In custom applications a belt drive system can be added to make linear movement automated. The rotary will always be manual.

length: 3 meters (can be customized)
 capacity: handles 200 lbs
 control: manual, semi automated
 MSRP: starting at \$4,500 USD*

* Prices and technical specifications subject to change without notice. For more information please visit www.trak-kit.com or contact us at 212.463.8782

02

SUPER TRAK

The Super-Trak comes in manual or fully automated version. It can be installed as manual and updated to automated in the future. It can handle up to 600 lbs in weight. It includes effortless remote controlled movements that are smooth, quite, and programmable. Control provided by RS-232, Crestron, AMX, Savant, Control4, Lutron, RTI. . .

length: 3 meters (can be customized)
 capacity: handles 600 lbs
 control: manual, automated
 MSRP: starting at \$6,000 USD*

03

90 DEGREE TRAK

The 90 Degree Trak can be manual or fully automated. It can be installed as manual and be upgraded to automated in the future. It can handle up to 900 lbs of weight. It makes right or left turns. It can also be customized and make two turns. The radius is 31.43 to the center of the Trak. Control provided by RS-232, Crestron, AMX, Savant, Control4, Lutron, RTI. . .

length: 3 meters (can be customized)
 capacity: handles 900 lbs
 control: manual, automated
 MSRP: starting at \$11,000 USD*

04

MULTI PANEL TRAK

The Multi Panel Trak is the only wall system in the world that slides, rotate and stacks carrying power and cables to the panels. One single panel or multiple panels can be on the same Trak. The panels can be shipped knocked down or customized with any material or finish. This system is ideal for MDUs and conference rooms where flexibility and aesthetics are a priority.

length: 3 meters (can be customized)
 capacity: holds up to 900 lbs
 control: manual, semi automated
 MSRP: starting at \$8,500 USD* (with 3 standard panel frames and track)

TRAK-KIT IS A REVOLUTIONARY PATENTED SYSTEM INVENTED TO BRING FLEXIBILITY AND VERSATILITY TO THE TELEVISION, HOME THEATER AND VIDEO DISPLAY EXPERIENCE.

Trak-Kit solves the common architectural problem of fixed location displays limiting the viewing possibilities and room design. Its design is appropriate for many creative applications in residential homes, commercial, hospitality, institutional, retail spaces and more.

A Trak-Kit consists of suspending a display, video conferencing equipment or a wall panel integrated with screens, speakers or lights... from a patented track system to allow for linear and rotational movement along a path. Vertical movement and landscape to portrait orientation can be implemented as well.

Available in smooth-gliding manual movement; upgradeable and fully automated models which allow users to automatically transport their displays to precise pre-programmed locations, a Trak-Kit system may be surface mounted or recessed in a ceiling with standard and customized finishes to match any design. Trak-Kit covers maybe customized to include lighting, speakers, and visual design features to complement the space. Trak-Kit covers are finished with a soft, elegant brush pathway allowing the display support tube to quietly move through the room as desired.

Wire management is clever and hidden thanks to the Trak-Kit E-Chain system that smoothly routes wires for power, video, sound, and internet inside the Trak. Wires travel neatly inside the display support tube and allow the display to rotate and elevate to different viewing heights.

TRAK-KIT BRINGS ARCHITECTURAL ELEGANCE AND INNOVATIVE DESIGN TO ANY SPACE THAT DESIRES SUCH FREEDOMS.

Trak-Kit is a truly custom solution; available in any desired length and may accommodate multiple displays. Furthermore, Trak-Kit also allows you to hide the display sliding into a custom pocket in the wall, turning into an art work when not in use or using one of Trak-Kit's wide choices of display covers.
