

## GENERAL DRAWINGS

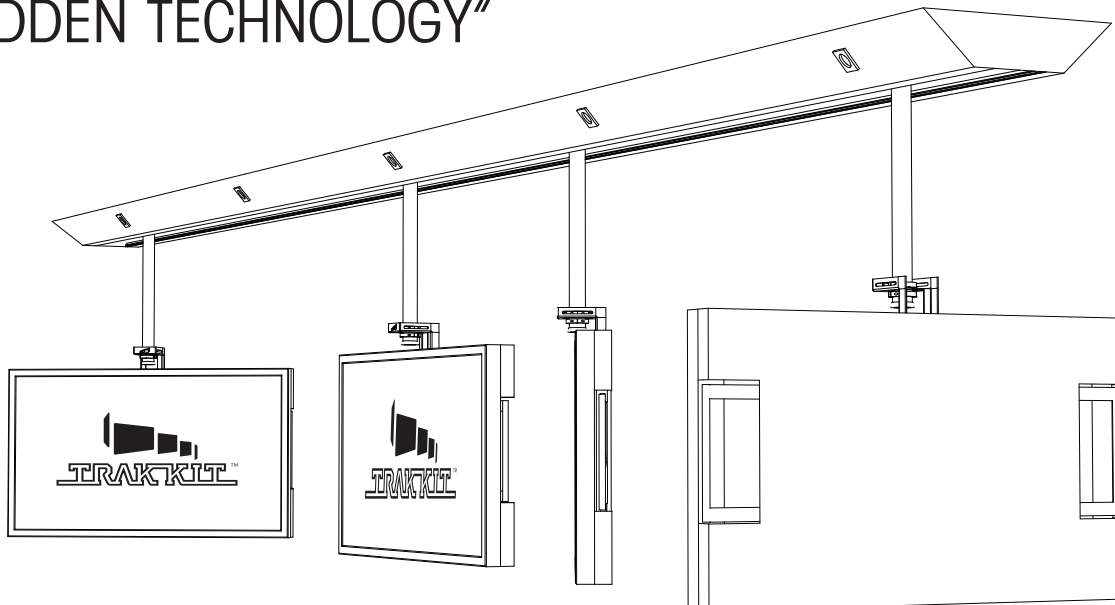

audio/video mobile architecture

“MOVABLE - ROTATABLE”

“ARCHITECTURAL ELEGANCE”

“HIDDEN TECHNOLOGY”

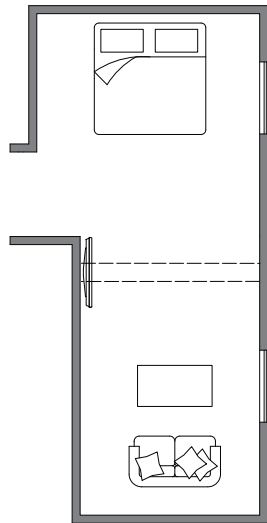

“CUSTOMIZABLE”

In this setting, the client wanted multiple viewing positions without crowding the space

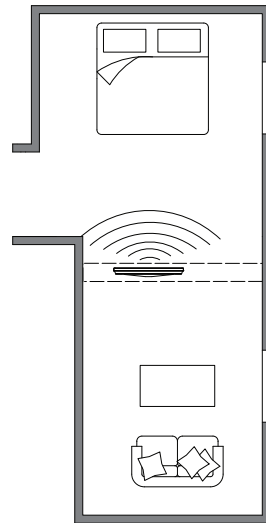

The overall environment is easier, simpler and more enjoyable

When not in use the TV is parked against the wall.

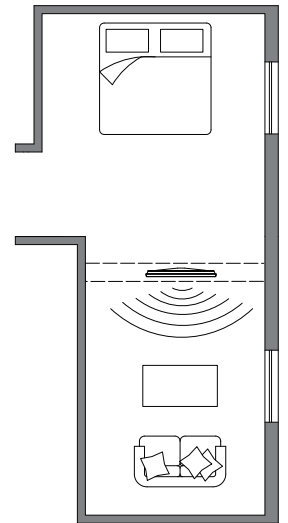

An artwork can be hung behind the TV allowing the client to enjoy the space without seeing the TV screen

EXHIBIT 3

FACING  
SEATING AREA

In this audiophile's setting, the main purpose for this 50" flat screen was mobility and elegance

The space is used as a live/work environment and the flat screen needed to be viewed in different areas with the minimal effort

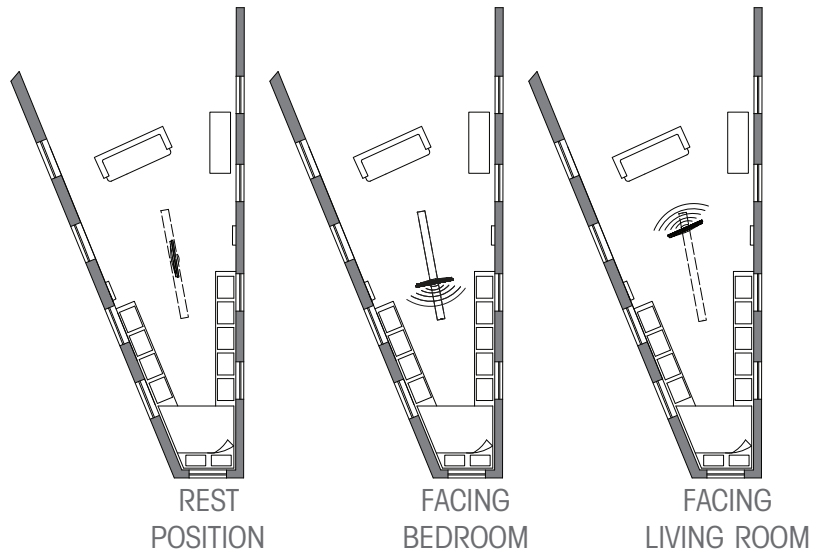

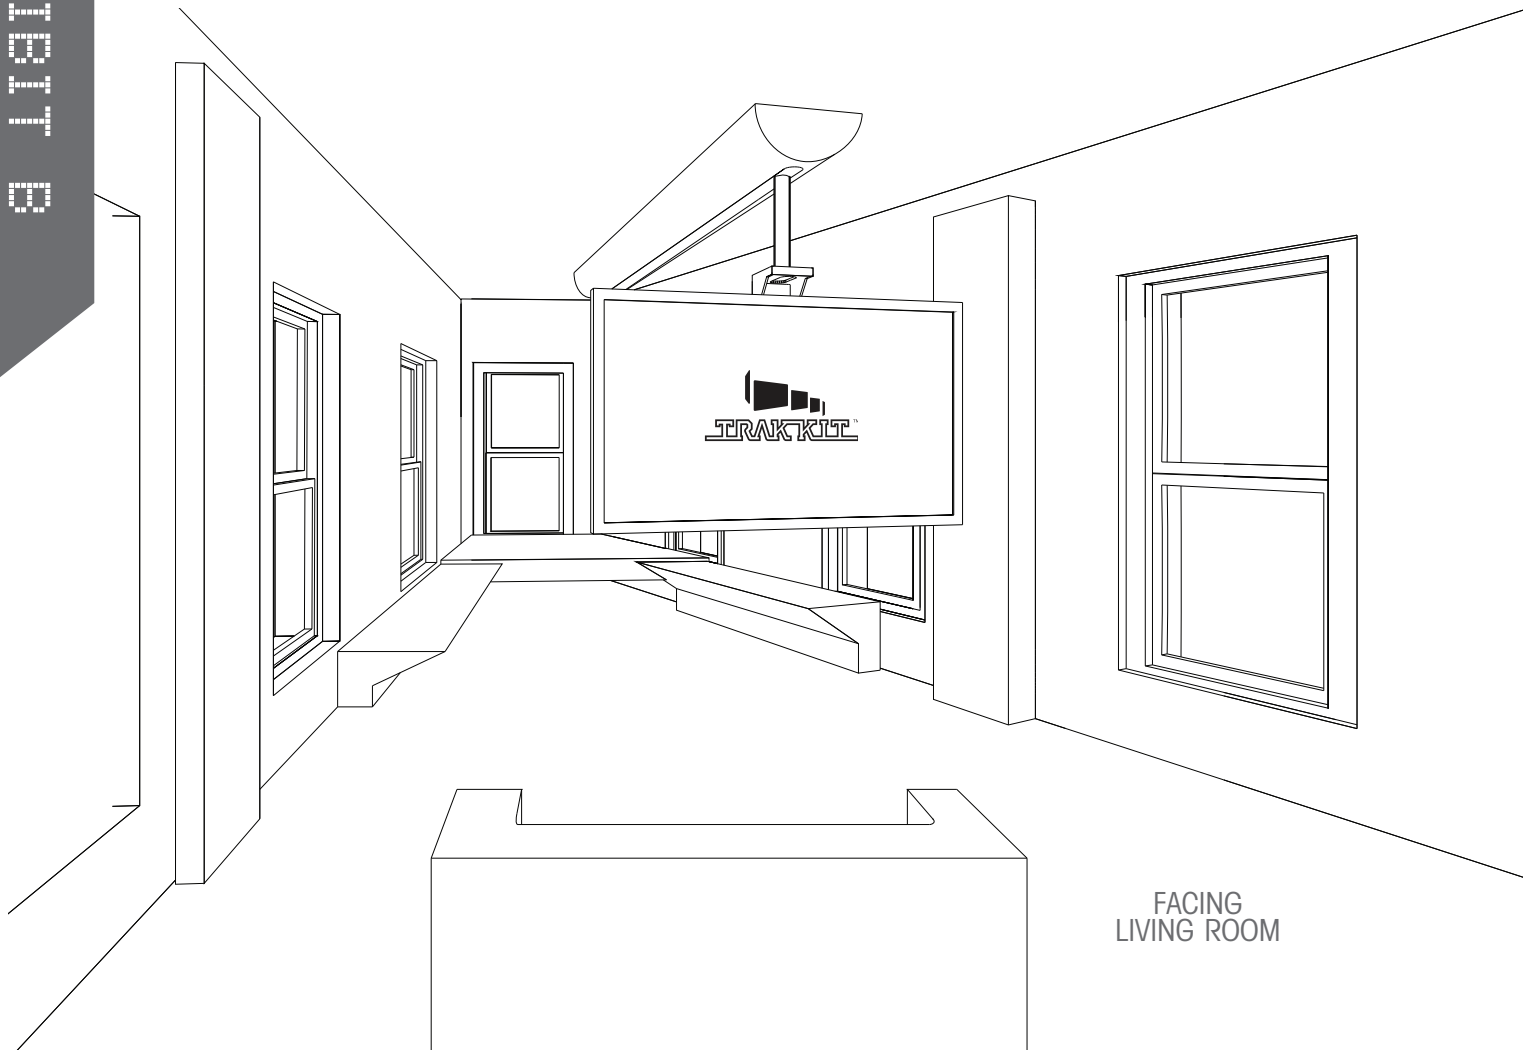

EXHIBIT 9

The ultimate home  
entertainment center for a  
modern family

A single flat screen needed to  
function as a TV monitor, game  
terminal, computer screen  
and video conferencing

When not in use the TV is stored  
away in a custom Trak-Kit cabinet

## COMPACT

Custom brackets attach high end speakers to screen - allowing for a compact configuration

## WIDER SOUNDSTAGE

Custom brackets extend to accommodate a wider sound stage

VERSATILITY

In this one bedroom apartment the client can enjoy the flat screen in his bedroom and living room

The multi panel-trak creates two separate rooms but can also slide and stack on its rest position opening the space up
